It is very reassuring to see that most sustaining members are long-time supporters of the QGIS project - thank you very much!

Training certificates

Approved trainers or training companies who offer QGIS courses (worldwide) can purchase official QGIS.ORG certificates (€ 20.- per certificate). QGIS.ORG verifies that the trainers are

competent for training and keeps a registry of trainers and course attendees who successfully received training certificates. Special thanks go to Kurt Menke, Hans van der Kwast and Tim Sutton for handling the certification system and for reviewing training material.

Github sponsoring

Github sponsoring is an additional source of income introduced in 2021. On Github there is a “Sponsor” Button with a red heart icon. It allows users to select a monthly repeating payment for a certain period.

Expenses bug fixing

These expenses have been spent for bug fixing and quality assurance during the bug fixing period of the QGIS releases 3.24, 3.26 and 3.28. Several experienced QGIS core developers spread around the globe each spent several days for each release to improve the quality of the release version, many of them continuously since many years - thank you very much for your work! Giovanni Manghi (QCooperative, NaturalGIS) spent many hours managing the bug queue and trying to reproduce bugs and issues.

Expenses Code Reviewing

The project spent 14k € for GIT PR management and code reviewing. The available funds were split between Nyall Dawson (North Road), Matthias Kuhn (OPENGIS.ch), Mathieu Pellerin and Loïc Bartoletti (Oslandia).

Expenses Packaging

21k € were spent on packaging. Jürgen Fischer (Norbit) worked on the Windows (Standalone installer, MSI and OSGeo4W distribution) and Ubuntu packaging and Denis Rouzaud (OPENGIS.ch) worked on the MacOS packaging.

Expenses QGIS grants

Each year there is a call for participation in the QGIS grants program. Developers and other contributors can submit proposals for the enhancement of QGIS and its infrastructure. Voting members decide which proposals can be accepted with the available funds. In 2022 the following developers and contributors could be funded, the accounting includes one 2020 grant as well, that was finished with a delay:

- Alessandro Pasotti (itOpen, QCooperative): [QEP 242 Add SQL Logging in the debugging/development panel](#), (2022 grant)
- Bertrand Rix, Hugo Mercier and Julien Cabieces (Oslandia): [QEP 186 QGIS Vectorization of selective masking](#), (2020 grant)
- Denis Rouzaud (OPENGIS.ch): [QEP 245 QGIS setting registry follow-up](#), (2022 grant)
- Nyall Dawson (North Road): [QEP 243 Support building QGIS app on Qt 6](#), (2022 grant)
- Nyall Dawson (North Road): [QEP 247 Fix handling of provider default value clauses/Autogenerate/nextval\(...\) handling](#), (2022 grant)

Expenses for Documentation

In 2022 we paid Geodatenbüro Dassau and Harrissou Sant-Anna to work part time on the QGIS Manual.

Expenses contributor meetings

After the COVID break we were happy being able to meet again in late August in Firenze. The contributor meeting was aligned with the FOSS4G 2022 conference and was held prior to the conference.

Infrastructure expenses

This includes expenses for web server infrastructure at provider Hetzner, our MacOS build servers at Untangled Technology. It also includes occasional sysadmin work. Work on a new version of the QGIS.ORG website could be started and will be continued in 2023.

Special thanks

We'd like to thank all donors and sustaining members! Without your contributions we wouldn't be able to support the QGIS core developers, with their travel costs and we wouldn't be able to organize paid bug fixing, QGIS grants and QA for each QGIS release! Besides voluntary unpaid work, a major driver of QGIS development is paid feature development, not handled through QGIS.ORG, but directly between companies with QGIS developers and organizations and companies willing to invest into new QGIS features. A special "thank you" goes to developers and contributors who do voluntary work in their leisure time and to organizations who help QGIS by investing into companies who improve QGIS with new features.
